Help for Areas That May Not Display Properly in the Google Map Viewer

Some areas of our Stormwater Permitting areas are not displaying correctly in the Google Map because of shape complexities. We missed this handful of areas before posting the update in February 2013, and we apologize for the inconvenience. In these areas, you will not see any color, and when you click in that area, the message reads:

Information: There are problems displaying permit information in some areas. If all layers are turned on and you still get this message, please contact DWQ Stormwater Permitting Unit at (919) 807-6300 for assistance.

Below are the areas we know about, with additional guidance. Please call the Stormwater Permitting Unit at (919) 807-6300 for more assistance.
